## **AGE DETAILS**

- **TO 2.5 YEARS PLAY GROUP FEES**
- **2.5 TO 3.5 YEARS NURSERIES**
- **3.5 TO 4.5 YEARS LKG**
- **4.5 TO 5.5 YEARS ULG**

## **FOR ADMISSION DOCUMENT REQUIRMENTS**

- **BIRTH CERTIFICATE**
- **ADDRESS PROOF**
- **ONE PHOTO GRAPH**
- **MARKLIST OR CERTIFICATE OF EARLIER CLASS IF APPLICABLE**

## **SCHOOL TIMING:**

- **PLAY GROUP – 10:30 AM TO 1:00 PM**
- **NURSERY - 10:30 AM TO 1:30 PM**
- **KG-I - 10:30 AM TO 2:00 PM**
- **KG-II -10:30 AM TO 2:00 PM**

**TRANSPORTATION AVAILABLE**

### Allied services of Intelligence school

- Week-end Intelligence Workshops
- Backed up by day care facility
- Intelligence Summer School
- Certification Programs in Intelligence
- Teacher's Training Programs
- Discovery & Invention Programs
- Young Scientist Club
- Making best of childhood-Day & night care

### FAQs

#### What is intelligence?

Perspectives on intelligence vary. Especially in general social references intelligence could be used in a highly misplaced way. Classical understanding of intelligence is 'Application of knowledge'. Hence whosoever applies what is known to him could be said to be intelligent.

#### At what age child should be talked about on intelligence?

An unborn child pushing into mother's womb going by his own assessment that he is biologically mature enough to see the world could be sighted as earliest examples of application of knowledge.

#### Is it possible to improve on the intelligence?

Intelligence is both a capacity & its utilization. Improving the core intelligence is very complex but its capacity utilization is certainly a matter of creating the right psyche. Thinking is a habit & that could be developed easily.

#### Will intelligence enhancement improve child's academic performance?

If academics is treated purely from an angle of performance in examination then majority of the examinations test the knowledge aspect of the student. But competitive examination, personal interviews test the intelligence capability of an individual. Intelligent children will in general outsmart other children in non-formula based examinations.

#### Is it possible to quantify intelligence?

IQ tests attempt to do that & give you consolidated score. But IQ itself is an outdated examination because the real challenges of living have scores of other dimensions in it.

#### How does career choice matter with respect to one's intelligence?

Once you learn to qualify your intelligence you would know that a skill based/ operations based job would need more technical intelligence, planning jobs would need higher logical intelligence, sports performance would need a good body & mind intelligence, to speak of few.

#### What are multiple intelligences?

IQ treats intelligence as a one solitary function. But people who fair poorly in math could come out as brilliant technicians, artists or athletes. IQ apparently does not believe that athletic performance or artistic performance requires intelligence. By & large the academic syllabus could be qualified into verbal intelligence (Languages) & logical intelligence (Math, Science, Accounts, Economics).

#### **What is intelligence profiling?**

Intelligence profile is a graph of individual intelligence scan. How you are placed on different intelligences will create a different asset/ profile.

#### **What are tools of intelligence development?**

Since intelligence is application of knowledge the varied ways in which knowledge could be applied or operated upon would produce intelligence. Hence simple operations like addition or subtraction applied on a data would produce intelligence.

#### **Does IQ actually play importance in real time performance?**

There are a few occasions where IQ could act as the most appropriate test, although such challenges are getting steadily out of lifestyle.

#### **Intelligence... Ifs & buts**

- Use of formula requires minimal intelligence, creation of formula requires much more
- Memory recall is not an intelligence function although creation of systems through which data is stored is intelligence demanding function.
- Thinking about a problem enhances intelligence application worrying about problems recedes the intelligence.
- Learning the tables by heart is a shortest way to solving figure related problems, although making a choice of what to learn requires added intelligence.
- In general the challenges of life are simple when there is only one solution to a problem. They intensify when it requires suggesting more than one solution to the problem.
- In general inventing a formula is equivalent to creating a system although implementation of formula would require lesser intelligence than operating a system.
- Running a system requires much less intelligence; decision making requires more frequent use of intelligence.
- Two & two would make four only in specific circumstances; math tables could be applied only conditionally.

## PROFILE OF A FOUNDER DIRECTOR

**Prashant Brahmane** is the Chief Consultant and Managing Director of **Manscan Management Consultants Pvt. Ltd**; a hardcore human research and consulting organization. He is a Chemical Engineer and a management graduate from IIM-Bangalore.

He is a **Personality Consultant, a Communicational Specialist, an Intelligence Developer and a Human Brand Consultant**. He has been offering Personality Clinic services for over a decade, helping recreate a notion of Self-Discovery in an organized form through the concept of Psychograph. He has been working on synergizing between the God-given and the business driven aspect of human living. It creates a beautiful balance between the development of hidden traits and creation of new facets.

He has made pioneering efforts in operationalising **3rd & 4th Generation Interviews**, which are destined to put human judgment out of the thumb rule closet. That also offers greater scope for more creative use of individual assets.

He has discovered a concept of **Self Image**; a hidden engine that controls and directs human lives. Self Image, once decoded, can help an individual understand himself well. Better & more appropriate life plans could be thought of on the basis of one's Self-Image.

He is a staunch proponent of **Direct Knowledge**. This is an energy condensation of all that is around in human sphere; physical or metaphysical. The Direct Knowledge brings one to the spring of knowledge, making the books of principles only the followers.

His fond professional work includes ideas on escalating an individual from knowledge plane, through the intelligence medium, on to the plane of wisdom. This is the basis of his efforts in reworking on the concept of Guru-Shishya Parampara.

Cretho is his organization that works on creative services for brand building, product ideas & communication. He is an author-publisher of popular titles

- **Making Best of Childhood**-process child book
- **Know your personality & Make your Psychograph** -self-help for personal intelligence
- **Rule with Intelligence**-to live life enlightened by your own ability to think
- **Map your Competency**-a corporate Geeta for HR people
